

Quality and environmental policy for IMAS A/S

It is our intention that IMAS A/S appears as an attractive, credible and quality and environmentally conscious collaborative partner within CNC lathing and milling.

A partner who is known for the provision of quality products with an elegant finish.

We attach importance to:

- the provision of a product that is carefully attuned to the customer's expectations
- the provision of good quality, always
- minimise our carbon footprint
- compliance with the Danish Veterinary and Food Administration's requirements in the production of components that will come into contact with food
- the provision of good professional sparring and consultancy on the basis of our considerable experience
- the ongoing maintenance/replacement of our manufacturing equipment, thus putting us in a position to provide the necessary quality and safety in our production
- ensure the upgrading of our staff's knowledge and skills
- meet our binding commitments, at all times

Our quality and environmental policy and our management system are designed in compliance with ISO 9001 and ISO 14001.

In our production of workpieces that will come into contact with food, we secure the necessary traceability and documentation of applied materials, thus ensuring that the workpieces are in compliance with legislation as well as our customers' requirements to food safety.

Our quality and environmental policy and management system apply to all the company's employees. Every employee is committed to work for the improvement of the efficiency of the management system, the protection of the environment and to take preventive measures against pollution.

We continuously work towards the improvement of our environmental performance.

25 May 2021

Allan Rasmussen
Managing Director

This policy is published on our website, pinned to the notice boards in office and canteen and can be handed out to costumers and collaborative partners
